Architect: Stiffe Hooker Architects
Constructed: Canam Construction
Completed: April 2009

MONARC™

CREATIVE PRECAST
COLOUR • TEXTURE • DETAIL

The construction of Nauhria group's new head office and reinforcing factory presented the opportunity to showcase MONARC's full array of creative ability. Black oxide coloured panels were MONARC Diamond Honed. MONARC's Cutting and Milling tools then carved out sections of decorative design. Whilst both the interior and exterior surfaces are highly aesthetic, the MONARC panels are also the structural components of the 2 level building

The building received the Monte Craven Architectural Building Commendation Award in the 2009 (CCANZ) Cement and Concrete Association Awards. MONARC sets a new bench mark in precast fabrication within New Zealand.
